EDUCATION

BS Computer Science
NUST Islamabad, H-12
2024 — Present

TECHNICAL SKILLS

Languages
Python C++ Java JavaScript

Web & Frameworks
HTML/CSS/JS React Express

AI/ML
PyTorch TensorFlow scikit-learn

Databases
MySQL MongoDB

CS Core
Data Structures Algorithms OOP OS

Tools
Vercel VS Code Postman

Muhammad Bilal Tariq

Computer Science Student | NUST Islamabad, H-12

PROFILE

Computer Science student at NUST Islamabad with hands-on experience in full-stack development, systems programming, and database design. Proficient in Python, C++, Java, React, and Express. Passionate about building practical software and exploring the intersection of Computer Security and Machine Learning.

EDUCATION

BS Computer Science
2024 — Present

National University of Sciences & Technology (NUST), H-12, Islamabad

- Coursework: Data Structures, Algorithms, OOP, Operating Systems, Database Systems
- Engaged in departmental projects and collaborative software development

PROJECTS

Qalam Clone
2024

Full-Stack Web Application

React Express Node.js MongoDB REST API

- Built a feature-rich clone of the Qalam academic platform used at NUST, using React and Express.
- Implemented user authentication, course enrollment, grade tracking, and assignment submission.
- Designed a RESTful API backend with Node.js/Express connected to a MongoDB database.

Bank Management System
2026

Database & Systems Project

Express Node.js JavaScript MySQL JDBC

- Developed a full-featured bank management system supporting accounts, transfers, and statements.
- Implemented role-based access for admin and customer with secure login and transaction history.
- Built with Node.js and Express backend connected to a MySQL database.

Library Management System
2025

Database Systems — NUST

Python MySQL OOP

- Full CRUD library system with borrowing records, fine calculation, and member management.
- Built with Python and connected to a MySQL database with a normalised schema design.

INTERESTS

Artificial Intelligence & Machine Learning
Interested in supervised/unsupervised learning, model training pipelines, and applying ML to real-world problems. Familiar with PyTorch and TensorFlow for building and training neural networks.

Large Language Models (LLMs)
Exploring transformer architectures, prompt engineering, and fine-tuning techniques. Curious about LLM applications in code generation, question answering, and retrieval-augmented generation (RAG).

Computer Vision
Interested in image classification, object detection, and convolutional neural networks (CNNs). Exploring OpenCV and PyTorch-based vision models for practical CV applications.

Computer Security
Passionate about secure software design, cryptography fundamentals, and the intersection of security with AI/ML systems.
